## Android Views and Compose in Views Let's do a quick test! You must answer at least 7 questions correctly to pass this quiz.

Return to pathway (https://developer.android.com/courses/pathways/android-basics-compose-unit-8-pathway-1#quiz-/courses/quizzes/e

HTML    Kotlin   XML	1. Which language is used to build View layouts?
<ul> <li></li></ul>	
Output  2. When building an app with Views, the concept of a Composable 'screen' should be replaced by which of the following?  Fragment ViewModel Composable Incorrect.  Activity  3. View Bindings are used to access and interact with XML declared Views.  True Correct!  False  4. In which Fragment lifecycle method is the View Binding inflated?  onViewCreated() onCreateView() Correct!  onStart() onResume()  5. View components can be accessed before the View Binding has been inflated.  True	○ Kotlin
2. When building an app with Views, the concept of a Composable 'screen' should be replaced by which of the following?    Fragment   ViewModel   Incorrect.   Activity	● XML ⊘ Correct!
following?  Fragment  ViewModel  Composable  Incorrect.  Activity  3. View Bindings are used to access and interact with XML declared Views.  True  Correct!  False  4. In which Fragment lifecycle method is the View Binding inflated?  onViewCreated()  onCreateView()  OnStart()  onStart()  onResume()  5. View components can be accessed before the View Binding has been inflated.  True	◯ Java
following?  Fragment  ViewModel  Composable  Incorrect.  Activity  3. View Bindings are used to access and interact with XML declared Views.  True  Correct!  False  4. In which Fragment lifecycle method is the View Binding inflated?  onViewCreated()  onCreateView()  OnStart()  onStart()  onResume()  5. View components can be accessed before the View Binding has been inflated.  True	
<ul> <li>ViewModel</li> <li>Composable</li></ul>	
<ul> <li>Composable</li></ul>	○ Fragment
<ul> <li>Activity</li> <li>3. View Bindings are used to access and interact with XML declared Views.</li> <li>● True</li></ul>	○ ViewModel
3. View Bindings are used to access and interact with XML declared Views.  True Correct!  False  4. In which Fragment lifecycle method is the View Binding inflated?  onViewCreated()  onCreateView() Correct!  onStart()  onResume()  5. View components can be accessed before the View Binding has been inflated.  True	Composable
<ul> <li>True</li></ul>	Activity
<ul> <li>True</li></ul>	
<ul> <li>False</li> <li>4. In which Fragment lifecycle method is the View Binding inflated?</li> <li>onViewCreated()</li> <li>onCreateView()</li></ul>	3. View Bindings are used to access and interact with XML declared Views.
4. In which Fragment lifecycle method is the View Binding inflated?  onViewCreated()  onCreateView()	5. 1.0.1. 2ago a a a a a a
<ul> <li>OnViewCreated()</li> <li>OnCreateView()</li> <li>OnStart()</li> <li>OnResume()</li> <li>5. View components can be accessed before the View Binding has been inflated.</li> <li>○ True</li> </ul>	
<ul> <li>OnViewCreated()</li> <li>OnCreateView()</li> <li>OnStart()</li> <li>OnResume()</li> <li>5. View components can be accessed before the View Binding has been inflated.</li> <li>○ True</li> </ul>	● True
<ul> <li>onCreateView()</li> <li>OnStart()</li> <li>OnResume()</li> <li>View components can be accessed before the View Binding has been inflated.</li> <li>True</li> </ul>	● True
onStart() onResume()  5. View components can be accessed before the View Binding has been inflated.  True	<ul><li>● True</li></ul>
OnResume()  5. View components can be accessed before the View Binding has been inflated.  O True	<ul> <li>True</li></ul>
5. View components can be accessed before the View Binding has been inflated.  O True	<ul> <li>True</li></ul>
○ True	<ul> <li>True   Correct!</li> <li>False</li> <li>4. In which Fragment lifecycle method is the View Binding inflated?</li> <li>onViewCreated()</li> <li>onCreateView()   Correct!</li> </ul>
O True	<ul> <li>True</li></ul>
	<ul> <li>True</li></ul>
False Correct!	<ul> <li>True</li></ul>
	<ul> <li>True</li></ul>

6. A ComposeView is a(n):
View that can host an Android View inside a Compose UI.
Android view that can host Jetpack Compose UI content inside a View layout
Android view that can host an Android View inside a View layout.
View that can host Compose UI inside a Compose UI.
7. Jetpack Compose and the View system can co-exist in your codebase.
● True ⊘ Correct!
○ False
8. The ComposeView uses its method to display Compose elements on the screen.
Composable()
● setContent()
<pre>setComposeContent()</pre>
<pre>displayComposable()</pre>
9. Jetpack Compose was designed with View interoperability right from the start.
● True
○ False
10. The flag that enables Android Studio to work with Compose is the:
O In project-level use buildFeatures { compose true }
■ In app-level use buildFeatures { compose true } Correct!
O In project-level use buildFeatures { enableCompose true }
<pre>In app-level use buildFeatures { enableCompose true }</pre>

## Results

You scored 9 out of 10. Congratulations! You have passed this quiz.
